

Appendix D

Assessment Patterns and Distribution by Class:

The following charts outline the 2016-2022 assessment patterns and distribution.

When analyzing the re-assessment results it is important to understand that the overall value is the market increase/decrease of that class from the valuation date of January 1, 2012 to the valuation date of January 1, 2016 for the 2017-2020 assessment years. The re-assessment cycle due to occur at January 1, 2021 was postponed until 2024. Other factors such as assessment methodology changes also impact the overall results.
